Relative Pitch

RELATIVE PITCH

Improve your ear skills with the best interval training app available on the iPhone.

How RelativePitch can help you

- ✓ Compose and improvise freely
- ✓ Hear each note, not just the overall sound
- ✓ Recognize intervals better - understand what you're hearing
- ✓ Enjoy music much more as your ears develop

“ So simple it has become my favorite app! Other developers should learn from this powerful application. iPods are small: they do not need a lot of visual clutter! This app keeps it simple and has custom settings one can set per their needs. I've had it three days and since I'm recovering from surgery I've had nothing better to do but play with this game. I'm getting much better at hearing intervals already... this app is a great tool. ”
Joe Maurer (Dec 23, 2009), United States

“ Excellent app, better than the rest I've used several of the pitch training apps out there and this one has been, by far, the best. I will definitely be upgrading from Lite to the regular app, it's worth every penny. This app not only teaches you the differences in pitch, it also tests you. It's design is simple, incredibly easy to use and navigate. ”
